

ART DECO

The Art Deco trend reflects a needed balance between modernity and traditionalism. It's fueled the resurgence of distilleries and speakeasies and comes into our homes via popular shows like *Peaky Blinders*, interior décor and graphic design. Visual cues of the period include blacks, metallics, jewel tones or pastels and textural elements like stucco, fur, and feathers. Interior design includes high shine faceted gold, decorative metal doors, lush wallpapers and geometric tile. For print, look for serif and gilt type with extreme dimensions, luxe papers, or black on black design techniques.
